Majors and Subject Codes for Courses offered by Departments:		
The standing faculty are organized into Departments within the School of Arts and Sciences based on their research discipline(s). The majors and courses serving undergraduates are therefore rooted in the disciplinary structure of our academic departments. Below you will find the Departments and Subject Codes that are administered by the School of Arts and Sciences. Beyond those offered by our departments, there are additional majors and minors that are available to undergraduates in Arts and Sciences which can be explored using the full list of majors and minors.

*The Communications Major in Arts and Sciences is a special partnership with the graduate program in the Annenberg School of Communications. Courses taken in Communications are counted as Arts and Sciences courses.

Majors and Subject Codes for Interdisciplinary Programs and Subjects:
The School of Arts and Sciences also supports a number of interdisciplinary programs that draw on the expertise, research, and teaching of standing faculty across the departments, the school, and the University. In some cases, the interdisciplinary majors are supported by Centers within the School of Arts and Sciences. The majors, programs, and course subject codes listed below represent the interdisciplinary units administered through Arts and Sciences, sometimes with joint ownership across schools. Beyond those offered through a formal interdisciplinary program or center, there are additional majors and minors available to undergraduates in Arts and Sciences which can be explored using the full list of majors and minors.
